SUMMARY

Proactive and enthusiastic B.Tech (IT) graduate from Rajagiri School of Engineering and Technology with strong academic performance and practical experience in full-stack web development using Flask and working with SQL and NoSQL databases. Skilled in problem-solving, teamwork, and adapting to emerging technologies. Interested in opportunities that combine creativity, innovation, and technology to deliver impactful digital solutions.

EDUCATION

RAJAGIRI SCHOOL OF ENGINEERING AND TECHNOLOGY

2022 - 2026

Bachelor of Technology in Information Technology | CGPA: 8.45

BEM GIRLS HIGHER SECONDARY SCHOOL

Senior Secondary (Class XII) | Percentage: 95.08%

2021

Secondary (Class X) | Percentage: 95%

2019

EXPERIENCE

Indian Institute of Space Science and Technology, Thiruvananthapuram

July 2024

- Completed an internship at IIST focused on cybersecurity and network threat awareness.
- Studied common spoofing techniques such as IP and email spoofing
- Gained foundational knowledge of detection and basic prevention strategies

TECFUGE BUSINESS SOLUTIONS

June 2025

- Learned functional workflows of key Odoo ERP modules like Sales, Purchase, and Inventory.
- Gained basic understanding of ERP customization and database-supported automation.
- Assisted in understanding ERP implementation concepts in an educational environment.

PROJECTS

NearbyNow

Tech Stack: Flask, MySQL, HTML, CSS, Bootstrap, GitHub

- Developed a full-stack Flask & MySQL web platform connecting local businesses, entrepreneurs, and customers with role-based dashboards and secure user authentication.
- Implemented responsive frontend (HTML, CSS) with listings, filters, cart & wishlist features, and Cloudinary-based image uploads to enhance user experience and engagement.

OPTICODE

Tech Stack: React (Vite), JavaScript, Python, Flask, MongoDB, REST APIs, Git, GitHub

- Developed an AI-powered Python code optimization tool that analyzes algorithmic inefficiencies, detects high time complexity patterns, and refactors code to improve performance.
- Built a full-stack web application using React (Vite), Flask, and MongoDB, implementing RESTful APIs, user authentication, and session management.

SKILLS

Programming: Python, C, C++, Java, SQL

Web Technologies: HTML, CSS, Bootstrap

Databases: MySQL, MongoDB

Core Concepts: Data Structures & Algorithms, OOP, DBMS

Languages Known: English, Malayalam, Hindi

CERTIFICATIONS

Foundation of Cloud, IoT, Edge & ML – NPTEL (IIT Kanpur)

Elite Certificate | Feb – Apr 2025
